

Your HVAC equipment is like a vehicle, boat or any other major mechanical system. It's a major investment, and requires periodic servicing to provide optimum performance. If it's not serviced, chances are that it will break down, usually at the most inopportune time. Our no-nonsense service plan is simple and provides value for your money. It includes annual servicing, no-nonsense coverage for up to \$650 in repairs for each system that is covered, emergency service and discounts for repairs and upgrades beyond the coverage.

Here's how it works:

1. After performing a service inspection we'll tell you whether your equipment qualifies for a service plan. If we feel your equipment is too old or at risk, we'll tell you.
2. You get to choose which HVAC components you would like covered. We usually recommend major heating and cooling elements at the very least.
3. Our no-nonsense policy ensures that you are provided with the best value for your investment by taking care of what matters, and leaving out what doesn't.

## What's Included

- Annual inspection by licensed technician
- Annual cleaning, adjustment and balancing
- Priority 24 hour emergency service
- 24-7 telephone support
- No charge for diagnostics or no-fault-found service calls
